

# Artificial Intelligence

What is Artificial Intelligence? How is it currently manifesting in agriculture, mass media, medicine, and many other fields in 2024? How did it come about? What are the ethical considerations involved in using AI?

If you want to learn about this fascinating and timely topic, come to our April meeting where our own Aileen Nowatzki, author and educator, will be speaking to us about artificial intelligence and answering our questions.

We hope you can join us for this social and fun meeting! Bring your friends so that they can learn about AI too! This is an in-person meeting, but we will also Zoom the meeting for those who can not attend in person. See page 5 for Zoom information and directions to Jackie's house.
